50. Memoriams

In memory of a dear father, Aurelious A. Baldwin who died April 12, 1947

April brings sad memories,
Of a friend whose gone to rest;
But you will never be forgotten,
By the one who loved you best,

Memories are treasures,
No one can steal;
Death leaves a heartache,
No one can heal.

Some may have forgotten you,
Now that you are gone;
But I shall remember,
No matter how long.
Sadly missed by,
Daughter, Cassie

Lynchburg sale follows cattle trends with lower prices

The first feeder cattle sale in Lynchburg followed recent cattle trends with lower prices. There were 2306 head. Top price was 84½.

1625 head steers weighing 641 pounds averaged $61.54 per cwt while 680 heifers weighing 550 pounds averaged $56.98.

Prices were obviously lower than expected. Steer calves were down $28.00 from a year ago. Some light weight calves were off as much as $35 from last year. Heifers averaged $23 below last spring. Yet, heifers were only $5 under steers this spring — usually we expect a $10 difference.

Market hogs are selling at $26 to $28. On this same day at the Feeder Pig Sale in Farmville 2229 pigs sold at new lows for the year. 35# 1's and 2's brought $13.65 per head.

There are many factors impacting on cattle prices: Prime interest rates at 20%; Sausage could be bought for 59 ¢ last weekend while hamburger was $1.39, and the general economy is not reflecting optimism.

* * *

Last weekend Number 1 hogs were moving at $26 per cwt. This is reflected in the inventory of hogs and pigs.

The National March 1 report shows numbers up 7%over a year earlier. The number of sows kept for farrowing is unchanged from a year earlier, but 21 percent more than 1978.

For the immediate future there will be good pork buys in the grocery store. At these levels, it is very difficult for the producer to cover out-of-pocket costs.

We will be releasing parasitized cereal leaf beetle larvae on May 28. I need three locations that meet the following criteria: 1. There must be larvae present at 2—20 larvae per square foot or 1—10 larvae per 20 stems. 2. No disturbance of the soil (plow, cultivate or drag) until after the parasites have emerged the following spring. Grain that is seeded with clover is an ideal situation. 3. A host crop (wheat, oats, barley) should be seeded in adjoining field this fall. 4. No insecticide applied in year of release (1980) to field or adjoining fields.

Give me a call this week (352—8244) if you are interested. We are getting good response to releases made over the past two years.
